Shaft Alignment
Entry level measurement and alignment system for rotating machines
E420
ENTRY LEVEL REDEFINED!

SETTING A NEW STANDARD
Easy-Laser® E420 sets a new standard in entry level laser systems for shaft alignment. Wireless measuring units, a large 5.7” colour display and an IP65-rated design that withstands harsh environments. These are the features you would normally only find in more expensive systems! Simply put, Easy-Laser® E420 has everything an entry level system should have, and more. Take the next step into wireless freedom!

WHAT YOU CAN MEASURE AND ALIGN:

HORIZONTAL MACHINES
Horizontally mounted machines often consist of a pump and a motor, but can also include other types of machines such as gearboxes and compressors. Regardless of the machine type, it is easy to measure and align with Easy-Laser® E420.

VERTICAL/FLANGE-MOUNTED MACHINES
This program is used for alignment of vertical and flange-mounted machines, e.g. pumps, motors, gear boxes. Shows centre offset, angular error and shim value at each bolt.

VALUES – DIGITAL DIAL INDICATOR
The Values program can be used e.g. when one wants to measure as with dial gauges and to check bearing play or shaft load. With the standard equipment and completely normal set up on the machine!

EASY-LASER® E420 HIGHLIGHTS
• Easy to learn and to use.
• Compact measuring units for use on most machine designs.
• All wireless units
• Large, easy to read 5.7” colour display.
• Programs with both symbols and text = easy to understand.
• TruePSD technology with unlimited resolution.
• Dual PSD, dual laser beams and dual inclinometers for superior control and accuracy.
• 3 year warranty gives assurance.
• Fast service and support. 48-hours Express service if necessary.
• Low overall costs during the entire lifecycle of the product, for example calibration, accessories, etc.

Easy-Laser® is used to align pumps and motors for all types of installations in a variety of industries. Correctly set-up and aligned machines are necessary to reduce energy consumption and achieve optimum service life.

Easy-Laser® is used to align generators and gearboxes in wind turbines of a number of sizes and makes. Special brackets are available for alignment with locked rotors to increases the safety of the operator.
THIS IS HOW IT WORKS

EASY TO USE
Alignment should be easy! That is the fundamental philosophy behind our measurement systems. The simple mounting system and straightforward user interface make the Easy-Laser® E420 easy to learn, easy to understand and easy to use! To the right you can see the procedure for measurement of a horizontal machine.

EASY TO USE = FAST RESULTS
- Mount the equipment quickly with the pre-mounted units.
- Enter all machine data with the barcode reader*.
- Start measurement anywhere on the revolution, without the need for an exact position, then turn a minimum 20° to the next position.
- Adjust the machine in live mode in both Horizontal and Vertical directions.

1. Enter the distances between measuring units and the machine feet. If you enter the coupling diameter you can also get the result as gap/sag.
   A. Information field. States what you must do at each stage of the measurement.
   B. You can also measure machines with 3 feet pair.

2. Take the measurement values in three positions with as little as 20° between.
   C. The detector surface is shown on the screen and functions as an electronic target for the laser beams.
   D. The measuring unit’s position is shown.
   E. 20° marking.

3. The live values reflect the adjustments made to the machine. For clarity, the adjustment is displayed both graphically and numerically. Horizontal and Vertical directions are shown at the same time.
   F. Shims values and horizontal adjustment values. Offset and angular values are colour coded in order to determine the result more quickly: red—outside tolerance, green—inside tolerance.

4. Document the measurement result. See next page for more information.

BARCODE READER
The barcode reader is used to enter the machine data before measurement is taken. After the first measurement is recorded, the adhesive barcode label is applied to the machine. Next time the machine is checked, the measurements, compensation values and tolerances can be read directly from the barcode. Simple and accurate! (*Barcode reader is accessory.)
SMART FUNCTIONS

EASYTURN™
The EasyTurn™ function allows you to begin the measurement process from anywhere on the turn. You can turn the shaft to any three positions with as little as 20° between each position to register the measurement values. Voila! Measurement is complete!

SOFT FOOT CHECK
Alignment work begins with a soft foot check. The soft foot check ensures that the machine is resting evenly on all its feet by indicating which foot/feet should be adjusted. This is an important part of securing a reliable alignment.

THERMAL GROWTH COMPENSATION
Oftentimes, machines expand considerably when moving from a cold to hot operating temperature. The Thermal Growth Compensation function allows the measurement system to calculate the appropriate shims and values needed to make adjustments in such cases.

TOLERANCE CHECK
Measurement results can be checked against pre-defined tolerance tables or values you determine yourself. This allows you to immediately see if the alignment is within the approved parameters, thereby considerably reducing the amount of time spent on alignment.

MEASUREMENT VALUE FILTER
An advanced electronic filter function can be used to achieve reliable results even under poor measuring conditions. Air turbulence and vibrations from adjacent machines are no match for the Easy-Laser® E420 advanced filter function!

LIVE-ANY-ANGLE 360°
This function allows you to adjust machines in real time with the measuring units positioned anywhere on the shaft. It is ideal for situations in which outside objects interfere with normal positioning.

MULTIPLE SETS OF FEET
The software can adjust to machine designs of most types such as those with two pairs of feet, three pairs of feet, and feet in front of the coupling, etc.

DOCUMENTATION

SAVE IN BUILT-IN MEMORY
Save all measurements in the Display unit’s internal memory.

SAVE TO USB MEMORY
Save desired measurements on your USB memory. This enables you to take it to your computer to print reports whilst leaving the measurement system in place.

MAKE A PRINTOUT
Quickly print all measurement data locally with a thermal printer (accessory).

EASYLINK™
With the EasyLink™ database program for PC you can save and organise all your measurements in one place, produce reports with both data and images and export to your maintenance systems.

SOFT FOOT CHECK
1. Start measurement at any position!
2. 40° Min.
3. Finished!
**DISPLAY UNIT**
The display unit has a thin, easy-to-grip rubber-coated exterior for secure handling. The large well-spaced panel buttons correspond to clear graphics that guide you through the measurement process with ease. Water and dust proof to class IP65.

**LANGUAGE SELECTION**
Choose the language that you want to appear on screen. English, German, French, Spanish, Portuguese, Swedish, Finnish, Russian, Dutch, Polish, Italian, Japanese, Korean and Chinese are available.

**FEATURES**
- Robust, rubber coated design, IP65.
- Large 5.7” colour display.
- Language selection and symbols.
- Guiding software.
- Bar code reader support.
- Large internal memory
- User profiles with your personal settings.
- Integrated calculator.
- Conversion tool for length units.
- USB interface.

**MEASURING UNITS**
The measuring units have large detectors (TruePSD) that allow you to measure from distances up to 3 metres (10 feet). The substantial design made of aluminium and stainless steel guarantees precise measurement and reliable alignment in even the toughest environments. The measuring units are water and dust proof to class IP65.

**ALWAYS WIRELESS CONNECTION**
The measuring units are connected to the display unit wirelessly, which gives you full freedom to move around your machines with the display unit!

**CHARGING**
For charging, connect the two measuring units to the Display unit with the supplied splitter cable. This way you can also supply the measuring units with power during measurement, if needed.

**FEATURES**
- Compact units with built-in wireless technology as standard. Integrated rechargeable battery.
- TruePSD technology with unlimited resolution for greatest accuracy.
- Large 20 mm detectors [0.78”].
- Dual laser beams and PSDs.
- With electronic inclinometers in both measuring units, the system knows exactly how they are positioned making it easier to align uncoupled shafts.
- Pre-mounted units for quicker mounting.
- Electronic targets, that is you can see on the screen where the laser beams hit.
- Sturdy aluminium body. IP65 design.
- Compact units, easy to mount on the machine also when space is limited.
- Battery status indicator on the unit.
### TECHNICAL DATA

**System**
- Relative humidity: 10–95%
- Weight (complete system): 6.3 kg [13.9 lbs]
- Carrying case: WxHxD: 500x15x170 mm [19.7”x6.3”x6.7”]

**Measuring units M / S**
- Type of detector: TruePSD 20 mm [0.78”]
- Communication: BT Wireless technology
- Operating time: >4 h
- Resolution: 0.01 mm [0.5 mils]
- Measuring errors: ±1% +1 digit
- Measurement range: Up to 3 m [10 feet]
- Type of detector: Diode laser
- Laser wavelength: 635–670 nm
- Laser class: Safety class 2
- Laser output: <1 mW
- Electronic inclinometer: 0.1° resolution
- Thermal sensors: -20–60 °C
- Environmental protection: IP class 65
- Dimensions: WxHxD: 69.0x61.5x41.5 mm [2.72”x2.42”x1.63”]
- Weight: 176 g [6.2 oz]

**Display unit**
- Type of display/size: VGA 5.7” colour screen, backlit LED
- Displayed resolution: 0.01 mm / 0.5 thou
- Internal battery (fixed): Heavy duty Li Ion chargeable
- Operating time: Approx. 30 hours (at typical user cycle)
- Temperature range: -10–50 °C
- Connections: USB A, Charger
- Communication: BT Wireless technology
- Internal memory: >2000 measurements can be saved
- Help functions: Calculator, Unit converter
- Environmental protection: IP class 65
- Housing material: Anodized aluminium / ABS plastics
- Dimensions: WxHxD: 250x175x63 mm [9.8”x6.9”x2.5”]
- Weight: 910 g [2.0 lbs]

**Cable**
- Charging cable (splitter cable): Length 1 m [39.4”]

**Brackets etc.**
- Shaft brackets: Type: V-fixture for chain, width 18 mm [0.7”].
  - Shaft diameters: 20–450 mm [0.8”–17.7”] (extendable)
  - Material: anodised aluminium
- Rods: Length: 120 mm, 60 mm [4.72”, 2.36”]
  - Material: Stainless steel

**EasyLink™ Data base software**
- System requirements: Windows® XP, Vista, 7, 8, 10. For the export functions, Excel 2003 or newer must be installed on the PC.

### OPTIONAL BRACKETS ETC.

- A. Magnet base, Part No. 12-0013
- B. Magnetic bracket, Part No. 12-0413
- C. Thin shaft bracket, Part No. 12-0039
- D. Sliding bracket, Part No. 12-0039
- E. Offset bracket, Part No. 01-1165
- F. Extension chain, Part No. 12-0128
- G. Extension rods
  - Length 30 mm [1.18”], (1 x) Part No. 01-0938
  - Length 60 mm [2.36”], (4 x) Part No. 12-0059
  - Length 120 mm [4.72”], (4 x) Part No. 12-0124
  - Length 240 mm [9.44”], (4 x) Part No. 12-0060
- H. Barcode reader, Part No. 12-0619

---

A complete system contains
1. Measuring unit M
2. Measuring unit S
3. Display unit
4. Shaft brackets with chains
5. Extension chains
6. Rods 120 mm [4.72”]
7. Rods 60 mm [2.36”]
8. Measuring tape 3 m [9.8”]
9. Charger (100–240 V AC)
10. DC split cable for charging
11. DC to USB adapter, for charging
12. Quick reference manual
13. USB memory with manuals and EasyLink™ PC software
14. Carrying case
